

Solutions for every space

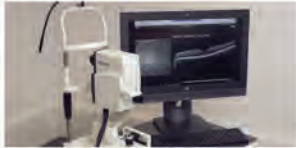

SPECTRALIS®

**HEIDELBERG
ENGINEERING**

Configured For You

Heidelberg Engineering understands that every clinic is a unique space, so we offer a range of instrument table configurations designed to meet the needs of every customer.

Before your new SPECTRALIS or SPECTRALIS SPIRIT is installed, your dedicated account manager will visit your clinic to perform a "site survey", where they will assess the space you have available and provide their recommendation for the most suitable configuration for you. This gives you peace of mind and allows you to get on with looking forward to receiving your new technology.

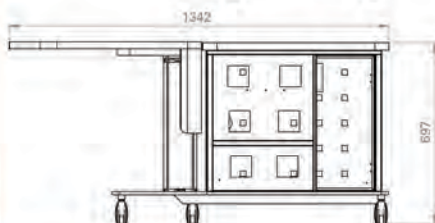

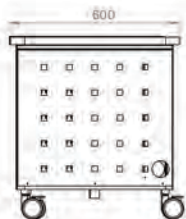

TSL-210 Table

A popular compact table suitable for a single SPECTRALIS SPIRIT or SPECTRALIS with standard headrest.

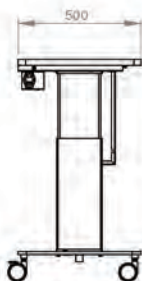

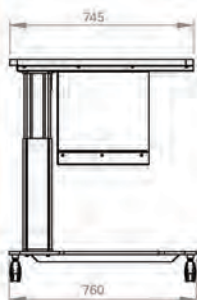

TSL-200 Table

A table designed for "Plus" configurations of the SPECTRALIS with space for the touch panel and patient cannulation.

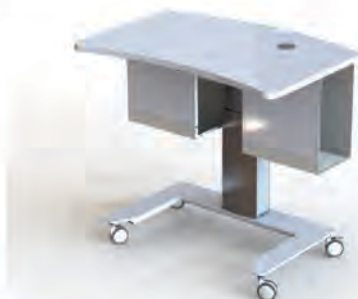

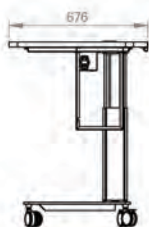

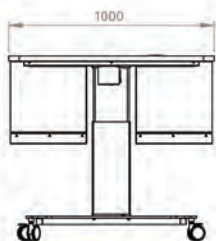

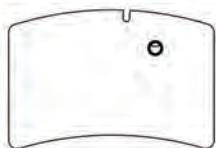

Single Position Table

The most compact table suitable for SPECTRALIS SPIRIT or SPECTRALIS with a standard headrest.

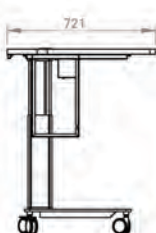

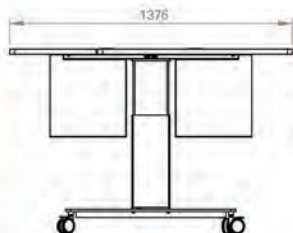

Two / Three Position Table

A table that allows up to two additional instruments (such as a fundus camera) to sit beside your SPECTRALIS or SPECTRALIS SPIRIT.

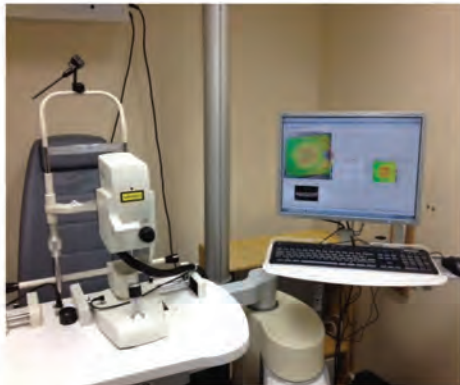

Three Position Table

A table that allows two additional instruments (such as a fundus camera and non-contact tonometer) to sit beside your SPECTRALIS or SPECTRALIS SPIRIT.

Refraction Unit

Heidelberg Engineering can provide a bespoke installation of the SPECTRALIS on your existing refraction unit. Your dedicated account manager can provide advice during your site survey.

Monitors

Heidelberg Engineering has a range of monitor solutions to maximise your space. Whether you choose wall mounted, floor standing or table top, you will get the same great quality and service.

Use your iPad to view images taken with the SPECTRALIS SPIRIT.

Call Heidelberg Engineering on 01442 502 330 to book your site survey now.
